

HP SAN ENGINEER

Toronto and Ottawa

The person filling this role would perform the function of a SE (Systems Engineer), would be the technical resource working with the sales team to confirm configurations, do setup and testing of Storage and Servers at our site, do installation and integration at the customer site, do pre-installation audits, assessments, do proof of concepts or pilots.

Work with the sales team to help get the order, and then be the technical lead in implementing the solution. Previous expertise with SAN technology, Blade Servers, Intel Servers, UNIX servers, Backup and Restore strategies would be an asset.

Requirements:

HP ASE or MASE Certified (SAN)

5 years industry or consulting experience

"Nice To Haves"

MASE - San Architect

ASE - StorageWorks

AIS - StorageWorks

APC - Enterprise Storage Solutions
