

Land Development Engineer Project Manager

Client is a growing firm servicing land developers and municipalities in Simcoe County, Greater Toronto Area as well as across Ontario. Our typical projects include residential and industrial plans of subdivision as well as ICI site plan developments.

We are currently looking to add to our complement of licensed professional engineers capable of coordinating land development projects. The successful applicant will be responsible for the design of municipal services, tendering and coordination of inhouse personnel and sub-consultants, liaison with regulatory agencies and procurement of approvals. Positions are being considered in our Collingwood and Caledon offices.

As a licensed Professional Engineer in Ontario, the successful applicant will be duly required to take professional responsibility for the projects he/she is involved with. A minimum of 5-10 years experience in this field of practice is required.
