

**Lead, Architecture and Data Management  
Markham**

Applications are now being received for the above position in the IT Department, Corporate Services Commission.

**SCOPE:**

Reporting to the Manager, Applications & GIS you will be responsible for providing leadership to the Data Management team in support for several municipal business applications and GIS systems.

**DUTIES:**

Primarily a lead, architecture and data management position, you will be reporting directly to the Manager, Applications & GIS, and work closely with other staff in the ITS department. In this position you will play a critical role in providing leadership in implementing information management, and other supporting roles as part of Enterprise Architecture implementation in the department. You will be supervising other database administrators who maintain and enhance existing databases that support business applications. In addition, it is the responsibility of this position to ensure spatial data storage is optimized to provide higher accessibility and availability, as well as research and recommend improvements to methodologies and technology. You may perform other duties as assigned depending on the evolving business needs of the department and the Town.

**QUALIFICATIONS:**

Degree in Computer Science with five or more years of previous experience in database administration with interest and skills in overall information management is required. Knowledge of enterprise architecture and experience in systems integration methodology is also mandatory. The incumbent must have a proven expertise in Oracle and MS SQL administration, including reports, forms, designer, PL/SQL etc. Excellent communication skills and problem solving skills are mandatory, as well as the ability and experience in leading a group. Knowledge/experience in portal technology is considered a plus, as well as data architecture.
