

Salt Lake City Environmental Project Manager

Client is a fully integrated environmental consulting firm whose underlying philosophy is its worldwide commitment to support sustainable development through responsible environmental stewardship. Client provides diverse services worldwide on a broad array of environmental projects that require dynamic leadership skills. We are seeking an Environmental Project Manager for our Salt Lake City UT office for work in the western United States with a focus on environmental permitting in the pipeline, transmission and alternative energy industries.

Responsibilities:

- Preparation of NEPA documents and overseeing NEPA process
- Preparation and oversight of environmental documentation
- Project permitting
- Agency consultation
- Conducting community involvement programs
- Project management
- Strategic planning

Requirements:

- 10+ years of experience including 5 years of NEPA-related experience
- BS / MS degree in Environmental Science, Natural Resources Planning or a related field
- Experience with renewable and conventional energy and EIS-related projects
- Excellent written and oral communication skills
- Proficient in Microsoft Word and Excel

Client offers opportunities for growth in a team-oriented environment and a competitive benefits package including medical, dental, 401k and retirement plan.
