

Senior Environmental Health and Safety Specialists- Ontario

The successful candidate will be a hands-on, enthusiastic, motivated self-starter, with the ability to work both on their own and as part of a team with minimal supervision. Specifically the successful candidate will support multiple manufacturing locations including the provision of strategic direction on all EHS issues pertaining to the assigned sites and support the development, implementation and management of Site related EHS programs to ensure compliance, safe work practices and environmental commitment. The successful candidate must demonstrate a strong sense of initiative as well as strong influencing and negotiation skills. Strong knowledge of PC applications (Word, Excel, PowerPoint, Access and Internet) and general office equipment is required.

The successful candidate will possess a university degree, preferably in science or engineering, have extensive regulatory and technical EHS expertise, with 8-12 years related experience in a manufacturing or lab environment. Consideration will be given to individuals possessing an EHS related college diploma with corresponding years of practical experience. The successful candidate must demonstrate strong teamwork, analytical thinking, organizational skills and be detail oriented while handling multiple tasks.
