

Senior Geotechnical Engineer - Oakville, ON

Our client is seeking a Senior Geotechnical Engineer to take a lead role in their Sudbury Ontario office

Position Requirements

Working as a valued member of the Environmental Group the Senior Geotechnical Engineer will be responsible for:

- 8 to 12 years of P. Eng experience.
- Proven experience in writing a multitude of geotechnical reports providing a multitude of geotechnical recommendations for soil capacity and bearing pressure.
- Has experience with footing inspection, compaction testing, pavement testing, slope stability analysis but not limited to the mentioned items.
- Able to work with and motivate staff under his/her direction
- Responsible for the delivery of reports in a timely manner.
- Ability to express himself eloquently with spoken and written English

To contribute to our expert team you will bring:

- Experience working in an Engineering Consultancy
- Graduation or post graduation courses from a Canadian University preferred
- P.Eng. or P.Geo. license in Ontario
- A motivated, self starter with a demonstrated ability to work independently as well as within a team environment.
- Strong organizational and time management skills as well as attention to detail.
