

Senior Highway Design PM – Ontario

Overview:

The Transportation Group provides comprehensive planning, design, and engineering services for all phases of airports and aviation, bridge, rail, roadway, and transit projects. This is the place where great ideas and rewarding careers can really take off. With a unique multidisciplinary team approach, they are equipped with state-of-the-art survey tools, simulation models, specialized design software, and computer-aided design and drafting (CADD) facilities. The ongoing success of their team allows you to set the pace of your career.

Responsibilities:

An opportunity exists for a Project Manager to become part of a dynamic Transportation Engineering group, providing professional design and construction administration services to public sector clients, including the Ontario Ministry of Transportation, local municipalities, and others. As the successful candidate, you will be responsible for planning and designing municipal road work, services and drainage; preparing work plans and budgets for proposals; conducting site inspections, preparing condition reports, construction inspection; Class Environmental Assessment projects; preparing tender specifications, reports, and design briefs; and construction administration services.

Qualifications:

As the ideal candidate, you are highly motivated, registered as a Professional Engineer in the Province of Ontario, and have 10 to 15 years work related experience, including previous experience in highway/arterial roadway design. MTO design experience would be a definite asset. Local Ontario based knowledge is essential. You are a results oriented, self-motivated, forward-thinking individual possessing strong interpersonal and communication skills, both written and verbal. Your strong leadership, time management and team building skills are essential to meet the expectations of our supportive and proactive organization, which values and rewards the ability to get the job done. You demonstrate solid technical abilities in the area of municipal road and highway facilities and your previous exposure to construction activities would be an added benefit.
