

Senior Hydrogeologist - Alberta

Environmental Site Assessment & Remediation, Water Resources

As the successful candidate you possess 10+ years of Hydrogeology/Consulting experience, primarily in Alberta, and are a member of APEGGA.

You are a self-assured individual with a competitive drive to assume a leadership role within the Environmental Site Assessment & Remediation (ESAR) and Water Resource - Hydrogeology Group. There is a strong demand for high-quality, organized and consistent results. You are a confident individual who demonstrates strong initiative and is capable of independent action with the ability to make informed decisions. Excellent team-building and management capabilities, solid oral and written communication skills are desired. You are recognized for your high level of technical skills and practical ability to solve problems in various sectors including oil and gas and commercial/industrial settings. Oil and gas experience and familiarity with local practice and markets would be considered an asset.

The responsibilities for the **Senior Hydrogeologist** role are broad in scope, encompassing a wide variety of activities requiring rapid shifts in priorities. You will provide technical expertise and leadership to the ESAR and Water Resources groups as well as on-going business development and client liaison. You will be required to write and review proposals and technical reports as well as mentoring junior staff members. You possess a strong desire and capability to continue building, developing and leading a team of environmental engineers, scientists, and technologists.
