

Our client, was established in 1981 primarily to provide consulting services to the local oil and gas industry. CLIENT has since developed into a multi-disciplinary firm that provides engineering consulting services to the oil and gas, municipal, industrial, commercial and institutional sectors.

Client's substantial growth began in 1997 with the expansion of an electrical and instrumentation division. Further diversification was achieved in 2005 with the addition of a municipal engineering group. 2007 saw an additional milestone year with the asset purchase confidential Ltd. which launched confidential into the industrial, commercial and residential sectors. Client continues their commitment to providing high quality, value added design and project management services. Their location and leadership style has allowed them to respond quickly and cost effectively to address their expanding client base's needs.

Senior Oil and Gas Engineer – Southern Saskatchewan

The Role:

The successful candidate will be responsible for design, project management, mentorship and building oil and gas client relationships for CLIENT in southern Saskatchewan. This position will provide technical expertise and cost effective solutions to oilfield clients in a high quality, professional manner. Your ability to establish and ensure client satisfaction through superior communication, technical excellence and exceptional project management skills will ensure both the company and your success. The current preferred location of this new office is Weyburn, Saskatchewan but the final location will be based on the last phase of our market survey.

Qualifications:

The preferred candidate will;

Have a Bachelor's Degree in Mechanical, Chemical or Petroleum Engineering\ from a recognized educational institute.

Have a minimum of seven years previous oil and gas experience with\ extensive experience in facility and pipeline design.

Demonstrate strong communication skills and the proven ability to partner\ with clients in a solution based service model.

Have previous experience in the management of an engineering\ office.

Be prepared to relocate to the new satellite office in Southern\ Saskatchewan.

Be registered or be eligible for registration as a Professional Engineer\ with the Association of Professional Engineers & Geoscientists of Saskatchewan (APEGS).

Hold or be eligible for Permission to Consult with APEGS to act as a responsible engineer for CLIENT's Certificate of Authorization.

Have a reputation as a high performer within a team environment.

Maintain a valid Driver's License as a condition of employment.

The Rewards:

Candidates with extensive experience will thrive in this newly created opportunity. This is a unique opening and would be a match for candidates looking to establish, grow and nurture a new venture within a very successful firm who are ready and willing to provide you with the support and resources to ensure success.

Engineers looking for career expansion and who thrive in an environment which allows them to be involved in diverse projects, impact the bottom line and work with an organization that is action oriented, will be our ideal fit.

This position has an exceptional compensation and benefits package with a profit sharing component for the successful candidate.

Relocation assistance is available to the successful candidate, if required.

A flexible start date is available to ensure your transition to a new community is successful.

Southern Saskatchewan is a thriving and family friendly location with an exciting future ahead for the oil and gas sector and this new position and location.
