

## **Senior Project Engineer-Virginia**

We are currently seeking a Senior Project Engineer to join our Water/Wastewater group. This position is responsible for the successful implementation of technical leadership on our various water and wastewater projects. This position is a lead technical position to lead and train other staff, interface with equipment vendors, lead document production (drawings, specifications, reports, etc.), perform necessary technical calculations, etc. all while working with a Project Manager to accomplish our client's project objectives. This is a true "nuts and bolts" design engineer position requiring expertise in the general fields of water and /or wastewater treatment. This position requires a real team player willing and able to help a diverse base of clients and their associated needs

### **Skills/Requirements**

- Engineer with Civil PE, 8 to 10 years experience in water and /or wastewater design treatment plants.
- Has a working knowledge of technical and office support software required to perform the essential functions of the position.
- Must possess a valid driver's license and be able to operate a motor vehicle.
