

Client is an industry leader in program and project management, with 1,600 employees across Canada. CLIENT excels in the provision of multidisciplinary services for large-scale, complex projects, in the four principle markets of Infrastructure, Communities, Buildings, and Transportation.

Take the next step in your career. Join a great employer that is innovative, highly successful and committed to promoting high performers. Culturally, we offer exciting work that you can feel passionate about. We provide the opportunities for you to show initiative and develop your skills that will provide both near and long term career benefits. You will have the autonomy to get the work done and, of course, be recognized.

As a result of our continued growth and full slate of projects, we are currently looking for:

SR. MUNICIPAL ENGINEERS - Ottawa, ON

We are looking for senior engineers with experience leading land development projects for the private sector and municipal infrastructure projects for the public sector. A minimum of 5 years experience is sought however individuals with much more experience (up to 30 years) are also strongly encouraged to apply. There are a number of positions available (Project Engineer to Senior Project Manager). Applicants will be directed to the position that suits their experience and skill set. Ideally much of the experience will have been gained in the GTA.

CLIENT is a relatively large consulting engineering firm with its Ontario operation centred in the GTA. While the positions advertised are currently in our head office in Thornhill, there may be opportunities to relocate to other offices in the future. The positions offered are supported by many other professionals with complementary skill allowing CLIENT to offer many of our clients all of the professional services that they require, in-house.

Successful candidates will be self-starting individuals who demonstrate a high degree of professionalism and are very client focused. This will include a track record of completing projects on time and on budget with a high degree of client satisfaction. Candidates will also have a strong interest in and aptitude for both business and staff development. Candidates will also possess strong interpersonal and communication skills. Experience with computer applications such as AutoCAD and Softdesk are considered to be assets, particularly at the Project Engineer and Senior Project Engineer level.

CLIENT is very active in the Municipal Engineering and Land Development industries across the GTA and beyond. A small cross-section of current projects includes: a portion of the design-build assignment for the major York-Peel water supply main; project management for the design-build of several major sewer projects for the Region of York and others; several studies and designs for district energy projects for Enwave District Energy; engineering for the Cornell landowners group and engineering for most of the individual landowners within the group; engineering for the Brameast Phase 2 landowners group and program management for the \$17 billion Toronto Waterfront Revitalization project.

CLIENT offers a very positive and supportive work environment with strong technological support. Salary will be commensurate with experience and we offer a comprehensive benefits package. All positions will lead to the opportunity for an ownership position in the company.
